## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards wherein an original of copying or fax is read by a CCD image sensor and resulting image data are input to a data abnormality detecting section via an A/D converter and correcting unit. The sole independent claim identifies the uniquely distinct feature “for a detecting section configured to detect an abnormality in the gradation information of the image data input to an input section, an announcing section configured to announce the detection of the abnormality in a case where the abnormality is detected by the detecting section and a binarizing section configured to binarize the gradation information of the image data into 1-bit per pixel”. The closest prior art, Li et al. (USPN 7,062,099 B2) recite for calculating a gray-level statistical distribution of pixels of an image, detecting edge pixels in an image based on an edge criterion corresponding to the gray-level statistical distribution, dividing the image into a plurality of sub-images, determining a binarization threshold for each of the sub-images based on the gray-levels of edge pixels detected in the sub-image and performing binarization process for each of the sub-images based on the

binarization threshold of the sub-image; while Matsumura et al. (USPN 5,315,409) recites method of and apparatus for obtaining binary image, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
